

Sage 200 Self Start

Designed for those using Sage 50 who are looking for a straight-forward, affordable route to **Sage 200 Standard**.

Sage Business Partner

cpio.co.uk

The Process

Step 1: Mandatory Health Check:

A pre-engagement assessment conducted by the CPiO expert team, which reviews your Sage 50 data and current position to determine whether the Self Start programme is suitable for your business. Following the assessment, the findings will be shared with you.

The Health Check is designed to determine whether the Self Start programme is a suitable fit. Following completion of the assessment, both CPiO and the client reserve the right to decide not to proceed with the Self Start programme if it is determined that it is not appropriate or feasible.

The Process

Step 2: 6-week guided self-onboarding programme:

Weekly live online sessions that guide you through the setup process, helping you get Sage 200 Standard up and running with confidence.

This combines the flexibility of implementing the system yourself with expert support from CPiO when you need it.

From provisioning and data migration to training, go-live, and ongoing support, we'll help you every step of the way.

Easy Onboarding of Sage 200 Standard

Sage 200 Self Start is a guided practice that includes the following onboarding services:

1

Week 1: Sage 200 Standard provisioning and setup

2

Week 2: Sage 50 data migration guidance and tools

3

Week 3: Expert-led, live online training sessions

4

Week 4: User Acceptance Testing (UAT) support & Q&A Sessions

5

Week 5: Go-live assistance and support from a CPIO consultant

6

Week 6: Post-implementation support audit.

Pricing

Sage 200 Self Start implementation costs are **£3,490***.

*This includes the mandatory Health Check of your Sage 50 data. This is a non-refundable fee of **£495**.

The Self Start implementation package is available at a fee of **£2,995** and includes a 6-week onboarding programme for a single-company implementation.
